

Atos Unify Academy

OpenScape Xpressions Application Builder

Course code XPRAPBN

Target Group Any internal employee, channel partner, or customer administrator requiring automatic attendant configuration training using the OpenScape Xpressions Application Builder tool.

Course language	Delivery type	Duration
English	WBT	5.5 hr

Learning Target

After taking the course, the learner will be able to:

- Recognize the Application Builder terminology
- Configure the Vogue script
- Create a user profile in Service Provider to access the Application Builder
- Recognize the Application Builder page layout
- Recognize Application Builder controls (boxes)
- Recognize the need for an application concept and drawing
- Follow the seven steps to design and configure a basic automated attendant application using Application Builder

Prerequisites

XPRADM_VC must be completed before taking XPRAPBN. XPRADM_VC provides detail on the Xpressions Web Assistant and an overview of the Xpressions monitor.

Contents

This course introduces learners to the interface and function of the OpenScape Xpressions Application Builder automated attendant configuration tool. It focuses on the configuration steps required to design and implement a basic automatic attendant application.

Curricula

This course is part of following curricula

- [OpenScape Xpressions V7 Training for New Administrators - North America](#)

Comments

This course is a recorded course. After enrollment in the course the student download the zip files containing the MP4 media files along with the PDF files for the course documentation.
