

Atos Unify Academy

OpenScape Solution Customer Data Collection V7R1 (CDC) Tool Overview

Course code CDCV7R1SVS

Target Group Service

Course language	Delivery type	Duration
English	Virtual Classroom	3 hr

Course description

This SVU shows students the purpose of the CDC tool and the responsible roles. The user learns how the CDC tool is used according to the different phases in a standard project. They can see what green field data needs to be entered and by whom in the CDC tool, also what OpenScape Solution configuration files can be generated and where to obtain the CDC tool and documentation.
