

Atos Unify Academy

Atos Unify OpenScope Enterprise Express Installation and Provisioning

Course code OEEINSTSCS

Target Group Service / Staging

Course language	Delivery type	Duration
English	Classroom	4 days

Course description

The course starts with the explanation of the deployment models and architecture of the Atos Unify OpenScope Enterprise Express (OSEE). Furthermore the student continues with the configuration of customer specific data through the WebCDC tool. Afterwards required scripts and SW components will be provided to the 'Automated Installer' (AI) Application. In the next step the partially or fully automated installation process will be carried out. Further the student adapts the system manually and performs application checks. Security and hardening of system components will be discussed as well.

Learning Target

The engineer will be trained about the architecture and deployment models of the Atos Unify OpenScope Enterprise Express (OSEE) system. Furthermore, participants administers customer specific informations through a tool called WebCDC. Next activity by the student will be the provisioning of necessary SW components for the so called 'Automated Installer' (AI) which will be in charge to install and configure the applications. After this the course participant makes any necessary changes and performs a functional test. Furthermore, security aspects will be treated.

Prerequisites

Knowledge in LAN/WAN infrastructure.

Knowledge in VMware (ESXI and/or vCenter)

Beneficial would be OSE product knowledge but not mandatory.

Contents

Overview and Architecture

Deployment models

Automated Installation

Post-activities

Overview and check of the Applications

Curricula

This course is part of following curricula

- [Education Path for Atos Unify OpenScape Enterprise Express](#)
 - [Implementation & Support Associate Atos Unify OpenScape Enterprise](#)
-

Tests and Certificates

This course prepares following certification:

- [Implementation & Support Associate Atos Unify OpenScape Enterprise](#)
-

Offers

This course covers the provisioning, installation and check of the components of an OSEE system. It doesn't replace an individual training of OpenScape Enterprise products in general.
