

Atos Unify Academy

Atos Unify OpenScope Cordless IP for Service

Course code OCIBASISCS

Target Group Partner technicians configuring OpenScope Cordless IP. Unify Go personel.

Course language	Delivery type	Duration
English	Classroom	3 days

Course description

OpenScope Cordless IP V2 is a DECT multicell system for connecting DECT base stations to a Communication Platform. It combines the options of IP telephony with the use of DECT telephones. Large deployments use the DECT integrator server to merge multiple DECT Manager domains.

Learning Target

Understanding and configuring the DECT Multicell solution OpenScope Cordless IP V2 R1 for small, medium and large deployments.

Prerequisites

General understanding of DECT telephony. Configuring SIP subscribers in the Unify platforms OpenScope Voice / 4000 / Business.
