OpenScape 4000 - Backups on the 4K (V7-V8R1)

Course code OS4BACKUDS

Target Group Centralized support technicians
Installation specialists
Customer system administrators
Business partner trainers and technicians
System engineers and customer engineers

Course language	Delivery type	Duration
English	WBT	1 day

Course description

The OpenScape 4000 Backups course uses brief tutorials to provide unique insight into OpenScape 4000 system technology which will clarify the purpose for each type of OpenScape 4000 Backup. By providing administrative details and other operational hints for each type of OpenScape 4000 Backup, system administrators and maintenance personnel can more effectively manage the Backups that are ultimately required for system restoration in the unlikely event of failure at any level.

- This course requires the latest version of Flash.
- Please note the chapter of the online course may be delayed for a minute or two while the material loads. If the wait time is excessive (10 minutes) please try launching the course again.
