Atos Unify OpenScape Contact Center V11 R0 - Update Training for Service

---

**Course code** OCCV110UDS

---

**Target Group** Partner technicians, Unify GO staff, System Integrators

---

Course language	Delivery type	Duration
English	WBT	64 min.

### Course description

OpenScape Contact Center V11 R0 is a new major version of OpenScape Contact Center, which is not only the successor to OpenScape Contact Center V10 R4, but also the successor to the OpenScape Campaign Director product line. Upgrading from previous versions of OpenScape Contact Center to OpenScape Contact Center V11 is straightforward. The main new features are support for OAuth authentication for logging into Office 365, which replaces basic authentication and changes to enable users to log off properly from Agent Portal Web and the use of the latest openSUSE Leap 15.3 operating system on the OpenScape Contact Media Service Server. Further innovation in the Contact Media Service (CMS) includes a completely new component - the outbound dialer, that can also be used independently and which also succeeds the OpenScape Campaign Director. This outbound dialer was implemented via the CMS and offers extensive options for designing, executing and monitoring outbound campaigns. The CMS Voice Portal has also been enhanced to support additional languages and improvements in the Application builder. The reporting tool OpenScape Contact Center Analytics has been expanded accordingly to offer special reports on outbound campaigns in addition to its previous features.

---

### Learning Target

Enabling participants in installing and supporting OpenScape Contact Center V11 R0.

---

### Prerequisites

Expert knowledge of the previous version OpenScape Contact Center V10 R4, Optionally, Campaign Director knowledge.

---
