Unify OpenScape 4000 Update Workshop V11

Course code **OS4UP11WCS**

Target Group   Service

Self Maintainer

Administrators

Course language	Delivery type	Duration
English	Classroom	2 days

Course description

This online workshop covers upgrading OpenScape 4000 from version 7 Release 1 or 8.x to the current version V10.R1 or V11.R0 and the newly available features in version V10.R1 and V11.R1. Furthermore, the hardware, such as Enterprise Gateway, and new modules, such as STMIX/STMIY, will be shown. Innovations in the CP family of devices are also part of the course. The installation of the new container platform Kubernetes and the installation and handling of the OpenScape Endpoint Manager (OSEM) are also described. In practice, the course participant has access to an OpenScape 4000 system. New features can be queried or set up on this system.

Learning Target

In the workshop, the participant learns
- how to upgrade the OpenScape 4000 from V7R1 or newer to the new release V11.R0.
- the new features in versions V10.R1 and V11.R0 and can partially set them up.

Prerequisites

Know how of
- Unify OpenScape 4000 V7/8
- Unify OpenScape Softgate/Unify OpenScape Access 500
